Dear Cleve,

Eve has just told me about her conversation with you over McDonald and the PSE "test" that "proves" him an honest man.

I've filed with Hagath for the $10,000 reward. There has been no response.

I am in a unique position to make a solid, irrefutable case because of the work I've done, what documents I have and my knowledge of McDonald's ploy.

It will not be necessary to use any machine on him. It will not be possible for him to use any machine in his own defense, if he dares one, the $10,000 not being his. Fact will do it, irrefutably.

This gets around any question of can a psychopath or a pathological liar defeat/contact a polygraph.

I would like to do something about the evil McDonald has done and about that PSE fakery. I have much on that, including a so-called expert finding a certain perjurer to be an honest man - on the same subject.

If you want to talk about this let me know.

If the House assassinations committee does use the polygraph in the end it will not be good for polygraphers. They have no idea what they are doing and believe up is down on the two cases. I've had enough personal experience with them. They have begun with preconceptions and are determined to will them into the realities they are not.

Best regards,

Harold Weisberg
